

**ZEFIRO fuses the power and control of the road racer's drop bar with the low-drag form of the chrono rider's aero bar. It combines MISTRAL's aero wing with ERGONOVA bends and our unique PI Wing bar extension. The rider's forearms rest on silicon pads on the base bar's upper surface, while hands and wrists fall into a natural position on the aerofoil hand rest. ZEFIRO provides comfort for solo efforts and control for sprinting and climbing, perfect for century, sportive, and short-course triathlon riders. The Zefiro is legal for all UCI, USAT, WTC, and conforms to the 3:1 specifications set forth by the UCI.**
